| 60 | IX. Working Groups: <ul style="list-style-type: none"> • Content: Bill, Debbie, Jennifer, Shayn • Findability: Anamarie, Jennifer, John, Michael, Neal • Technical Implementation: Frank, Morris, Patrick, Steve, David, Gene, Sierra • Usability: Brenda, Donna, Kris, Linda, Sierra | <ul style="list-style-type: none"> Room 340 Room 302 Room 353 Room 301 |

Action Items for Review – Due October 24, 2006

ACTION: Develop a list of file types and versions that should be used for California web pages. The list should be prioritized by most desirable and focused on where we want to be in the future rather than where we are now.

Assigned To: Neal Albritton

Due: October 24, 2006 (Update)

Update: DOR and some IOUCA members met with Adobe on August 16, 2006. Adobe was represented by their sales representative for State of California, their accessibility expert, and a policy representative. Accessibility issues were addressed and discussed. Neal will send Adobe an overview of the meeting. A follow-up meeting will be held in about one month.

ACTION: The working group discussed the need for a broader implementation plan than what is contained in the recommendation. It was felt that integrated document with next steps should be developed to guide implementation of the recommended standards. John and Debbie will work on this offline.

Assigned To: Debbie Schwartz, John Jewell

Due: October 24, 2006 (Update)

Update: In progress.

Parking Lot

1. Frame the issue of application accessibility and usability.

Assigned To: Lee Macklin

Due: September 5, 2006 (Update)

Update: It was noted that many online applications are written by consultants; the state may not have the necessary skills to make changes. It was suggested that the two parking lot items be considered as Phase 2. IOUCA will need to work closely with CEAP on the two items. Lee Macklin and Neal Albritton will meet to discuss the issues.

2. Conduct high level research and frame the issue of accessibility and usability in regards to online forms.

Assigned To: Lee Macklin

Due: September 5, 2006 (Update)

Update: See above.

3. Content authors may benefit from training and instruction in writing for the web. There is a need for training for content developers. It may be beneficial if the IOUCA could identify these training needs. DHS offers web author training for readability, usability, and targeting information to the specific audience.

IOUCA Working Group Purpose and Definition – Updated April 3, 2006

Accessibility: The ability to fully acquire, use, and manipulate Web-based content and /or services by all individuals – regardless of individual age, disability, dependence on assistive technology to process information, or primary language.

Best Practice: A technique or methodology that, through experience and research, has proven to reliably lead to a desired result.¹ A generally accepted “best” way of doing something.²

Definition: A statement expressing the essential nature of something.³

Findability: “Findability refers to the quality of being locatable or navigable. At the item level, we can evaluate to what degree a particular object is easy to discover or locate. At the system level, we can analyze how well a physical or digital environment supports navigation and retrieval.” -Peter Morville. “You can’t use what you can’t find.” - www.Findability.org

Guideline: An indication or outline of policy or conduct.⁴ An attempt to streamline a process by establishing a set routine. By definition, following a guideline is never mandatory. “Guidelines may be issued by and used by any organization (governmental or private) to make the actions of its employees or divisions more predictable, and presumably of higher quality.”⁵

Policy: A high-level overall plan embracing the general goals and acceptable procedures especially of a governmental body.⁶

Procedure: A series of steps followed in a regular definite order; a particular way of accomplishing something or of acting.⁷ “A series of activities, tasks, steps, decisions, calculations and other processes, that when undertaken in the sequence laid down produces the described result, product or outcome. Following a procedure should produce repeatable results for the same input conditions.”⁸

Purpose: An object or end to be attained.⁹

Standards: Any definite rule, principle, or measure established by authority.¹⁰ “A standard is “Thou shall” while a guideline is a recommendation, more like “You should if your situation warrants.””¹¹

Usability: Usability is a quality attribute that assesses how easy user interfaces are to use. (Jakob Nielsen, Usability 101: Introduction to Usability, August 25, 2003, <http://www.useit.com/>).
